Welcome Message from Dr Kamran Yunus

Over the past 10 years, I have coordinated Downing College’s Summer Programmes for students from around the world. Our aim is to provide students with the opportunity to come and learn about academic subjects, whilst experiencing Cambridge’s unique scholarly environment.

Cross-disciplinary learning is at the core of the Summer Programme’s mission and 2024 is set to be our largest programme yet. The programme is designed as an enriching academic experience delivered through lectures, workshops, cultural experiences, and visits to University of Cambridge museums.

During the Summer Programme, you will have the opportunity to develop your knowledge of subjects that interest you, learn from experts in the field, and discuss and debate ideas with other curious individuals participating in the programme. To complement your chosen subject area, we offer a range of topics to broaden your academic perspectives before applying to study at university.

Additionally, you will immerse yourself in the ‘Cambridge experience’—living in typical undergraduate accommodation, attending a formal hall, punting along the River Cam, and much more.

I hope you can join us for an exciting and unforgettable summer at Cambridge.

Dr Kamran Yunus
Summer Programme Director at Downing College
Fellow in Chemical Engineering at Downing College
Associate Teaching Professor at Department of Chemical Engineering and Biotechnology
